NEW BULK OIL OPTIONS COMING SOON!

Pistons from the Severe Off-Road Dyno Engine Test

Competitive oil leaves soot and more piston deposits in the piston land and groove area and the undercrown area of the piston, which can cause the rings not to perform as designed. Plus-50 II is formulated for hotter off-road conditions to reduce piston deposit so the engine will perform optimally for a long time.

Minimizes Piston and Deposited Formulation

- Help reduce high friction and wear
- Help prevent excessive oil consumption and blow-by
- Increase engine performance

Plus-50 II Premium Oil

Competitor Premium Oil

BULK OIL DELIVERED TO YOUR FARM!

BENEFITS OF BULK OIL

***Save money** - buying bulk costs less than buying several drums at once. You'll see the savings immediately.

***Maintenance will be simpler** - using a tank is a lot faster and easier than dealing with drums. Not only will you be more organized, you'll be able to control inventory since the tank is easier to meter.

***Less waste** - fewer containers make bulk oil an environmentally-friendly option. You also won't have to deal with the stress of empty containers scattered all over your shop.

20% OFF SPRAYER NOZZLES

ARE WORN NOZZLES COSTING YOU?

Spray nozzles are some of the smallest and most overlooked pieces of equipment on a sprayer, but they have the greatest effect on accuracy, efficiency, and drift potential. Worn spray nozzles can increase application rates and/or change distribution patterns, causing under- and over-application and impacting your bottom line.

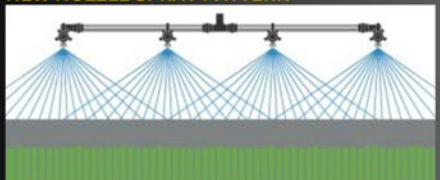

WORN NOZZLE SPRAY PATTERN

UNDER-APPLICATION

- Reduced yield
- Inadequate weed, pest, or disease control
- Repeated trips over the field

NEW NOZZLE SPRAY PATTERN

Replace nozzles if the flow from the nozzle varies more than 10% above or below the average of all the nozzles or the factory stated flow at 40 psi.
